

# 2021 NASA Small Spacecraft Forum

## *Format and Logistics*

Bruce D. Yost

*Director, Small Spacecraft Technology Institute*

*[www.nasa.gov/smallsat-institute](http://www.nasa.gov/smallsat-institute)*

- We are recording this opening session and will post it to the Forum website pending review.
- Most of today's presentations are short overviews and there will not be time in the sessions to offer to take verbal questions.
- If you have a question, you are welcome to write it in the WebEx "chat".
  - When asking a question, please identify the name of the speaker for whom the question is directed.
  - Responses will be posted to the Forum website as they are received from speakers after the opening session.
  - Please do not share ITAR or proprietary information in the WebEx 'chat'.
- The last two sub-sessions for today may offer opportunities for questions and answers in real time. Moderators will address the format and time available for questions at the time of the session.
- Visit the Forum Website for the opening session presentations (posted after today), latest information, and breakout session agenda updates over the next 5-6 weeks.
