EXPLORE SCIENCE

Space Fest at the Bell Museum

Staci Tiedeken

Solar System Exploration Division, GSFC

February 1-2, 2020

NASA GSFC SSED at Space Fest

Roughly **2,000** people attended the Bell Museum's Space Fest in St. Paul, MN on February 1-2. Participants learned about lunar science, the Lunar Reconnaissance Orbiter (LRO) mission, NASA's Artemis program, meteorites, and the OSIRIS-REx mission courtesy of NASA Goddard Space Flight Center's Solar System Exploration Division. Event goers explored the Moon and near-Earth asteroid Bennu via hands-on tactile models, meteorites (including a touchable lunar meteorite), and Earth rocks.
