GLOBE Mission Earth & National Institute of Aerospace (NIA)

August 24, 2020

Virtual Training with Portsmouth Public School Teachers Aug. 13, 2020

During a virtual GLOBE & NASA eClips workshop, 4th grade teachers from Portsmouth, VA share their favorite cloud dance.

The Science Mission Directorate (SMD) Science Activation projects, GLOBE Mission Earth through NASA Langley's GLOBE Partnership and the National Institute of Aerospace (NIA), collaborated to provide professional development to fourth grade teachers in Portsmouth Public Schools. Twenty-two teachers became GLOBE Certified in the Cloud Protocol. During the virtual training, teachers discussed opportunities to embed NASA eClips resources, involve families in authentic science, and incorporate technology to ensure students engage in authentic science learning during their Fall 2020 weather unit. Additional support for teachers will be offered throughout the school year, and a GLOBE training on water quality is planned for second semester.
