My NASA Data Presents to NASA's Climate Change Research Initiative-Educator Ambassador Program

&

Elizabeth Joyner partnered with the GSFC/GISS Office of STEM Engagement to present to 23 teachers participating in the NASA GISS Climate Change Research Initiative Educator Ambassador Program on Dec. 8, 2020. She featured the My NASA Data Earth System Data Explorer (visualization tool), as well as other NASA Earth data resources which support climate change instruction.

The NASA GISS Climate Change Research Initiative is a year-long STEM engagement opportunity for NYC metropolitan area educators and graduate students to work directly with NASA scientists and lead research teams in a NASA research project. Educators participating in this opportunity become associate researchers at NASA GISS, as well as STEM education experts who integrate NASA education resources and content into their classrooms.
