

NASA Exploration Connection Releases Game-based Lesson: “Where are the Small Worlds?”

- “Where are the Small Worlds?” is an interactive and adaptive, game-based learning experience designed for audiences 12 years and older
- NASA Science data and images are aligned to standards, helping learners understand where these objects are located in a fun and engaging way

More than 1000 participated in testing

- > 85% want to do more of these
- > 75% are interested in Small Worlds
- > 70% reported greater curiosity

Success across environments

- Public, Private & Charter Schools
- Urban, Suburban, & Rural Systems
- Out of School environments

National release in March 2017 through conferences and social media
