NASA @ Odyssey of the Mind World Finals

May 22-24, 2019 - East Lansing, MI

Three NASA projects shared NASA science with ~1400 world finalists at this international creative problem solving competition. The NASA Earth Science Education Collaborative led this activity, working in collaboration with GLOBE Mission Earth and Project AREN (AEROKATS & ROVER Education Network). Activities included:

- An interactive booth at the Creativity Festival, including the Lunar Reconnaissance Explorer (LRO) popup exhibit.
- Hands-on activities included remote sensing, urban heat islands and kites, Citizen science through GLOBE Observer
- Science themed large group presentations, plus 4 virtual talks by scientists. Topics included: STEAM – Science behind the Music; Clouds Impact on Earth's Energy Budget; GO on a Trail; and NASA Earth Science and Landsat
