75 libraries selected from 49 states to become NASA@ My Library Partners

Seventy five libraries were selected from over 500 eligible applicants to become NASA@ My Library partners. They will receive training, STEM Facilitation kits, circulation kits and access to NASA Subject Matter Experts through a variety of channels. Chosen libraries demonstrated a commitment to quality STEM programming, and many of them have already fostered relationships with NASA SME's from NASA Centers, Night Sky Network, Solar System Ambassadors and others. Kits are currently being shipped, and a few webinar trainings will occur prior to the projects major in-person professional development workshop in February of 2018.
