The ASTROPHYSICS STRATEGIC MISSIONS PROGRAM develops, launches, and operates large strategic observatories in accordance with NASA’s goals to understand the universe and our place in it.

PROGRAM EXECUTIVES represent the mission for "up and out" HQ-level activities by tracking and reporting objectively on the status, risk, and issues; advocate for the mission within SMD; manage and coordinate communication among project, stakeholder, and community members.
PROGRAM SCIENTISTS are the senior NASA Scientists responsible for the science content of an SMD Science investigation. They ensure that the science NASA selects is the science NASA gets and advocates at HQ for the science of the mission.
CROSS CUTTING staff are responsible for managing and developing the technology programs, coordinating IDEA activities and programs, as well as APD communications in support of the division.
