

3-D Thursdays!

"Three-Dimensional" Series for Rural K-12 Educators

● Professional Development

● Networking

● NGSS Connections

First Thursday of Each Month

Upcoming: Jan. 5th at 7:00 pm Central Time

With hosts Dr. Rachael Arens, Research Associate at NASA/NAU PLANETS and Luke Henke, Albert Einstein Distinguished Educator Fellow at NASA

Have you wanted to engage students in student-centered STEAM activities that utilize NASA resources and help students foster career dreams related to space? Join us as we learn about the NASA Astro Camp so you can host NASA camps and bring NASA to your students and community!

Special Guest

Maria Lott

NASA Education Program Specialist, Stennis Space Center

Maria Lott is an Education Program Specialist with the NASA Southeast Regional Office of STEM Engagement where she serves as the NASA ASTRO CAMP® Collaborative Partners, ACCP, Project Lead, under NASA Science Mission Directorate and Science Activation Infrastructure Programs.

Maria received her B.S. in Science from the University of Southern Mississippi and her M.S. in Education Curriculum/Leadership from the University of William Carey, Mississippi. She found her passion in STEM education and leadership, working as math/science educator, Lead Teacher, Administrator, and Academic Instructional Coach for 33 years in Mississippi. Retiring from public education allowed her to continue her NASA dream job of 30 years with Stennis Space Center as NASA ASTRO CAMP Education Program Specialist and Project Lead taking the local NASA program to national and international program participants as a NASA's Science Mission Directorate-Science Activation Infrastructure Program.
